PROJECT STATUS REPORT

Project Name	FurScan
For Week Ending	Week of November 13, 2023
Project Status	Green ☺
Status Description	- Documents updated/added - Prototyping completed - Both frontend and backend are well in-progress

Activities—During the Past Week

- Updated and completed some more documentation
- Completed Low-Fidelity and High-Fidelity prototypes
- Started work on frontend portion of mobile (Android device) application
- Contacted several animal clinics/veterinarians

Activities—Planned for Next Week

- Continue work on frontend and work on linking it with backend
- Increasing the size of our image database with image duplication and augmentation techniques
- Creating/drafting the flowchart portion of the application
- Securing a meeting time with one of the clinics

Project Issues

- Current frontend was done using Flutter, however before we got much done we realized it doesn't have what we are looking for, continuing with React Native and Django REST framework moving forward

Project Changes

Changing Flutter frontend to React Native alongside Django REST framework
